Percentages computed from unrounded numbers. Data for 1988 and 1992 have been adjusted to a 365-day basis before computing percent changes. 3/ Figures are based on the same during any part of the year, except for the Michigan Upper Peninsula market, for which all the data were restricted and thus excluded. 2/ Represents changes over the previous year. Excludes Georgia, Alabama-West Florida, Nashville, Memphis, and Central Arkansas, August to date. Figures also exclude Michigan Upper Peninsula, for which some of the data estimated 150 million pounds in August 1992, respectively, that normally would have been pooled under this order. The total estimated amounts of milk not pooled for this reason group of comparable markets--markets where the orders were in effect the entire period 1992-93, and for which the data were not affected significantly by marketing area changes; through the month of August are: for 1993, 4.1 billion pounds; and for 1992, 2.4 billion pounds. 1/ End-of-year figure. Remaining annual statistics are for all markets in effect * Because the blend price adjusted for location was at or below the Class III price in some zones of a market in the East North Central region, handlers elected not to pool an were restricted. 4/ Average or total. May not add due to rounding.

normally would have been pooled under Federal milk orders. As this milk would have been classified as Class III under the orders, the utilization in butter, cheese, and nonfat dry *Due to the unusual price relationships and/or qualification circumstances in some markets in 1988 - 1992 and 1993, handlers elected not to pool significant volumes of milk that milk production for these years were affected. 1/ Includes producer milk and other source milk used to produce manufactured dairy products in regulated pool plants as well as milk diverted and shipped to non-order plants for 2/ In addition to listed manufactured products, includes milk, skim milk, and cream used in other manufactured dairy products: e.g. cottage cheese, evaporated milk, condensed processing. Other source milk at regulated plants includes bulk transfers and diversions from other Federal orders, and receipts from unregulated sources. Some of the data are preliminary and partially estimated.

3/ Represents changes over the previous year. Percentages are based on the data for all markets combined. These changes are based on pounds of butterfat, except for nonfat dry milk, dried products, and aerated cream; milk, skim milk, and cream used in other food products as well as used in animal feed, dumped or spilled, plant loss, and miscellaneous

milk, which are based on pounds of skim milk. Data for 1988 and 1992 are adjusted to a 365-day basis before computing percent changes.

4/ Represents the data for all Federal milk order markets, except for New York-New Jersey. For percentage changes based on comparable markets, see tables 18 and 19. 5/ Percent changes have been adjusted for the different number of days in the 2 periods. The volume figures have not been adjusted.

1/ In-area sales include total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.

2/ Plain, flavored, and miscellaneous whole milk products.

3/ Plain, solids added, flavored, and miscellaneous lowfat and skim milk products, and buttermilk.

4/ Represents changes over the previous year. Percentages are based on the same group of markets comparable in both years. Data for 1988 and 1992 are adjusted to a 365-day basis before computing percent changes.

5/ Adjusted to eliminate variation in data to calendar composition and seasonality.
6/ Represents the data for all Federal milk order markets except for New York-New Jersey. The data for June and July 1993 are preliminary.
7/ Percent changes have been adjusted for the different number of days in the 2 periods. The volume figures have not been adjusted.

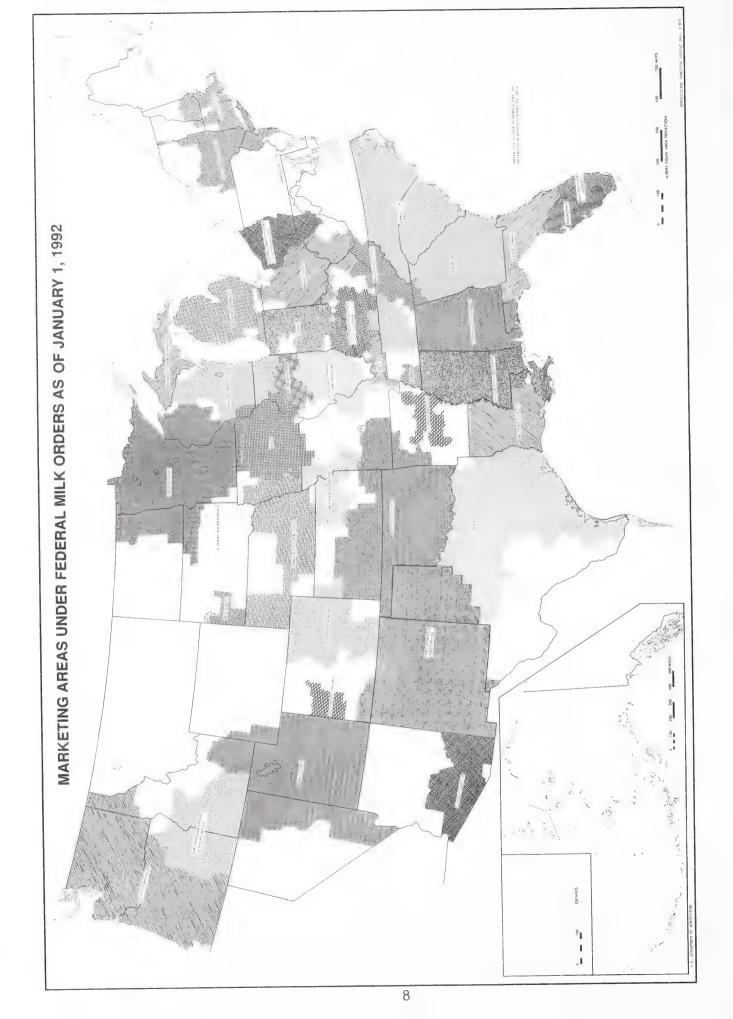

TABLE 1--FEDERAL ORDER FLUID (CLASS I) DIFFERENTIALS, JULY 1993 AND MINIMUM FEDERAL ORDER CLASS I PRICES, JULY AND AUGUST, 1993 AND 1992 $\underline{1}/$

½/ Prices are for 100 pounds of milk of 3.5 percent butterfat content. Prices are listed generally for the major city in the marketing area; see footnotes on page 40 for these locations. 2/ The fluid differential is the amount added to the basic formula price to determine the Class I price. The basic formula price is the Minnesota-Wisconsin price for the second preceding month adjusted to a 3.5 percent butterfat content. See Table 26. The fluid differentials shown for New England, New York-New Jersey, and Michigan Upper Peninsula reflect location adjustments. The differentials specified in the orders are: New England - \$2.52, New York-New Jersey - \$2.42; and Michigan Upper Peninsula - \$1.15. 3/ The order regulating this marketing area was terminated effective July 31, 1993.

FOOTNOTES FOR TABLE 2.

1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the marketing area. All averages are weighted.

2/ For those markets which have base-excess plans (see table 21) the prices

represent a weighted average of the base and excess prices.

- 3/ Zone 1 (Boston). Price at 201-210 mile zone: Class I and blend, 72 cents less. Class I and blend price at Hartford, 10 cents less. Class III-A price for May 1993 is \$11.11.
- 4/ New York metropolitan area. Price at 201-210 mile zone: Class I and blend, 72 cents less; Class II and Class III, 8 cents less.
- 5/ Philadelphia, Baltimore, and Washington, D.C. Price excludes a 6-cent direct delivery differential applicable to milk delivered to the Philadelphia area. Class III-A price for March 1993 is \$11.13.
 - 6/ Charlotte.
 - 7/ Atlanta.
 - 8/ Zone 2 (Birmingham).
 - 9/ Jacksonville and Tallahassee.
 - 10/ Miami.
- 11/ Applies to the skim milk portion of all milk which is either disposed of for fertilizer or livestock feed or dumped.
- 12/ Zone II (Marquette).
- $\overline{13}$ / Individual handler pool. Blend prices are weighted average of all handlers. $\overline{14}$ / Zone 1 (Detroit). Price excludes a 10-cent direct delivery differential
- applicable to milk delivered to the Detroit metropolitan area.
- 15/ Cleveland and Pittsburgh.
- $\overline{\underline{16}}/$ Zone 3 (Columbus). Class I and blend price at Cincinnati (Zone 4) 7 cents more.
- 17/ Indianapolis.
- 18/ Zone 1 (Chicago). Class I and blend price at Milwaukee (Zone 4) 9 cents less.
- 19/ Peoria.
- $\overline{20}/$ Base Zone (Alton). Class I and blend price at Carbondale (Southern Zone) and at St. Louis 9 cents more.
- 21/ Figures are based on the same group of comparable markets—markets where the orders were in effect the entire period 1992-93, and for which the data were not affected significantly by marketing area changes; all markets are comparable. However, figures exclude, where applicable, Michigan Upper Peninsula, Eastern South Dakota, Black Hills, and Western Colorado; the data used to weight the monthly prices were restricted. The applicable figures are:

area	1993	1992	1993	1992	1993	Class III 1993	Prod. Diff. Cents
E. S. Dakota Black Hills	13.07	13.03	12.77	12.27 12.67	12.93 12.05	12.52	6.7
W. Colorado			12.98	12.93	12.93	12.52	6.7

22/ Zone 1 (Minneapolis).
23/ Zone 1 (Des Moines). Class I and blend price

- 23/ Zone 1 (Des Moines). Class I and blend price at Rock Island, Ill., 7 cents less; and at Waterloo, 17 cents less.
- 24/ Zone 1 (Omaha).
- 25/ Kansas City and Topeka.
- 26/ Bristol, Chattanooga, and Knoxville.
- 27/ Little Rock.
- 28/ Zone 1 (Oklahoma City). Class I and blend price at Springfield, Mo., 58 cents less.
 - 29/ Zone 1 (Dallas). Class I and blend price at Houston, 54 cents more.
 - 30/ Monroe and Shreveport.
 - 31/ Zone 1 (New Orleans).
 - 32/ Denver.
 - 33/ Boise, Idaho.
 - 34/ Salt Lake City, Utah.
 - 35/ Phoenix.
 - 36/ Albuquerque, Santa Fe, and El Paso.
 - 37/ Zone 1 (Seattle and Portland). Class III-A price for May 1993 is \$10.72.
- 38/ A weighted average price for milk in excess of Class I needs calculated as follows: (producer deliveries used in Class II times the Class II price) plus (producer deliveries used in Class III times the Class III price) divided by (total producer deliveries in excess of Class I needs) would be \$12.61.

FOOTNOTES FOR TABLE 3.

1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the marketing area. All averages are weighted.

2/ For those markets which have base-excess plans (see table 21) the prices

represent a weighted average of the base and excess prices.

3/ Zone 1 (Boston). Price at 201-210 mile zone: Class I and blend, 72 cents less. Class I and blend price at Hartford, 10 cents less. Class III-A price for June 1993 is \$11.02.

4/ New York metropolitan area. Price at 201-210 mile zone: Class I and blend, 72 cents less; Class II and Class III, 8 cents less.

- 5/ Philadelphia, Baltimore, and Washington, D.C. Price excludes a 6-cent direct delivery differential applicable to milk delivered to the Philadelphia area. Class III-A price for June 1993 is \$11.04.
 - 6/ Charlotte.
 - 7/ Atlanta.
 - 8/ Zone 2 (Birmingham).
 - 9/ Jacksonville and Tallahassee.
 - 10/ Miami.
- $\overline{11}/$ Applies to the skim milk portion of all milk which is either disposed of for fertilizer or livestock feed or dumped.

12/ Zone II (Marquette).

- 13/ Individual handler pool. Blend prices are weighted average of all handlers.
- 14/ Zone 1 (Detroit). Price excludes a 10-cent direct delivery differential applicable to milk delivered to the Detroit metropolitan area.

15/ Cleveland and Pittsburgh.

16/ Zone 3 (Columbus). Class I and blend price at Cincinnati (Zone 4) 7 cents more.

17/ Indianapolis.

18/ Zone 1 (Chicago). Class I and blend price at Milwaukee (Zone 4) 9 cents less.

19/ Peoria.

- 20/ Base Zone (Alton). Class I and blend price at Carbondale (Southern Zone) and at St. Louis 9 cents more.
- 21/ Figures are based on the same group of comparable markets—markets where the orders were in effect the entire period 1992-93, and for which the data were not affected significantly by marketing area changes; all markets are comparable. However, figures exclude, where applicable, Michigan Upper Peninsula, Eastern South Dakota, Black Hills, and Western Colorado; the data used to weight the monthly prices were restricted. The applicable figures are:

Marketing area	1993	1992	1993	1992	Class II 1993	Class III 1993	Prod. Diff. Cents
E. S. Dakota Black Hills				12.71 13.10	13.78 12.03	12.03	7.0 7.0
W. Colorado 22/ Zone 1 (14.08	13.40	13.78	12.03	7.0

23/ Zone 1 (Des Moines). Class I and blend price at Rock Island, Ill., 7 cents less; and at Waterloo, 17 cents less.

24/ Zone 1 (Omaha).

25/ Kansas City and Topeka.

26/ Bristol, Chattanooga, and Knoxville.

27/ Little Rock.

- 28/ Zone 1 (Oklahoma City). Class I and blend price at Springfield, Mo., 58 cents less.
 - 29/ Zone 1 (Dallas). Class I and blend price at Houston, 54 cents more.

30/ Monroe and Shreveport.

- 31/ Zone 1 (New Orleans).
- 32/ Denver.
- 33/ Boise, Idaho.
- 34/ Salt Lake City, Utah.
- 35/ Phoenix.
- 36/ Albuquerque, Santa Fe, and El Paso.
- 37/ Zone 1 (Seattle and Portland). Class III-A price for June 1993 is \$10.66.
- 38/ A weighted average price for milk in excess of Class I needs calculated as follows: (producer deliveries used in Class II times the Class II price) plus (producer deliveries used in Class III times the Class III price) divided by (total producer deliveries in excess of Class I needs) would be \$12.32.

- 1/ Prices are for milk of 3.5 percent butterfat content and for the major city in the marketing area. See footnotes on page 40 for location at which price is reported. All averages are weighted.
- 2/ Figures are based on the same group of comparable markets-markets where the orders were in effect the entire period 1992-93, and for which the data were not affected significantly by marketing area changes; all markets are comparable. However, figures exclude Michigan Upper Peninsula, Eastern South Dakota, Black Hills, and Western Colorado where applicable; the data used to weight the monthly prices were restricted.
 - 3/ The data for this marketing area were restricted in 1992.
- 4/ In these marketing areas, milk was not pooled due to unusual price relationships. See "*" on page 4.
- <u>5</u>/ Figures are based on the same group of comparable markets-markets where the orders were in effect the entire period 1992-93, and for which the data were not affected significantly by marketing area changes; all markets are comparable. However, figures exclude Michigan Upper Peninsula, see <u>3</u>/.
- <u>6</u>/ The data for these marketing areas have been combined in order to mask restricted data. See table 1 for complete marketing area name.
- 7/ Excludes Southeastern Florida; Class III only applies to the skim milk portion of all milk disposed of for fertilizer or livestock feed or dumped. Otherwise, all orders which have three classes of utilization are shown. Producer deliveries of milk used in Class III can be determined by subtracting from total producer deliveries as shown on table 5, the appropriate figures on table 7, and this table.
- <u>8</u>/ Excludes Southeastern Florida; Class III only applies to the skim milk portion of all milk disposed of for fertilizer or livestock feed or dumped. Otherwise, all orders which have three classes of utilization are shown. Producer deliveries of milk used in Class III can be determined by subtracting from total producer deliveries as shown on table 6, the appropriate figures on table 8, and this table.

FOOTNOTES FOR TABLES 12 THROUGH 19.

- 1/ In-area sales include total sales in each of the areas by handlers regulated under the respective order, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handlers' in-area sales are partially estimated.
 - 2/ Plain, flavored, and miscellaneous whole milk products.
 - <u>3</u>/ Plain, fortified, flavored, and miscellaneous lowfat and skim milk products, and buttermilk.
- 4/ The "Year to Date" percent changes have been adjusted for the different number of days in the 2 periods.
 - 5/ Some of the data for this market have been estimated.
- 6/ Figures are based on the same group of comparable markets-markets where the orders were in effect the entire period 1992-93, and for which the data were not affected significantly by marketing area changes; all markets are comparable.
 - 7/ Excludes New York-New Jersey.
 - <u>8</u>/ Figures adjusted to eliminate variation in data due to calendar composition.
 - 9/ See table 12 for marketing areas included; excludes New York-New Jersey.
- 10/ Percent changes from February 1992 to February 1993 have been adjusted for the different number of days in the 2 months. The volume figures have not been adjusted.
- 11/ Total packaged disposition, in and out of the marketing area, by regulated handlers. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources.
- 12/ Light, heavy, and sour cream, and cream dips.
- 13/ In addition to listed fluid milk and cream products, includes yogurt and eggnog.
- 14/ Total packaged disposition, in and out of the marketing area, by regulated handlers.
- 15/ Includes producer milk and other source milk used to produce manufactured dairy products in regulated pool plants as well as milk diverted and shipped to non-order plants for processing. Other source milk at regulated plants includes bulk transfers and diversions from other Federal orders, and receipts from unregulated sources. Some of the data are preliminary and partially estimated.
- 16/ In addition to listed manufactured products, includes: milk, skim milk, and cream used in other manufactured dairy products, e.g., evaporated milk, condensed milk, dried products, aerated cream, and skim milk equivalent used to fortify fluid milk products; milk, skim milk, and cream used in other food products as well as used in animal feed, dumped or spilled, plant loss, and miscellaneous products.
- <u>17</u>/ Percent changes over the previous year are based on the same group of comparable markets--markets where the orders were in effect the entire period, 1992-93, and for which the data were not affected significantly by marketing area changes; all markets are comparable. These changes are based on pounds of butterfat, except for nonfat dry milk which are based on pounds of skim milk.
- 18/ Restricted.
- 19/ Marketing areas in which milk was not pooled in April 1991 and 1992 due to unusual price relationships were in this region. See "*" on page 6.
- 20/ Marketing areas in which milk was not pooled in May 1991 and 1992 due to unusual price relationships were in this region. See "*" on page 6.

Evansville, Michigan Upper Peninsula, Middle Atlantic, Nebraska-Western Iowa, New England, New Mexico-West Texas, New Orleans-Mississippi, New York-New Jersey, Ohio Eastern Colorado, Eastern Ohio-Western Pennsylvania, Eastern South Dakota, Georgia, Great Basin, Greater Kansas City, Greater Louisiana, Indiana, Iowa, Louisville-Lexington-1/ This pricing provision is currently in effect in 38 marketing areas. Three separate differentials and computed Class II prices are computed. For ease of presentation, these marketing areas have been grouped as follows: Group A: Alabama-West Florida, Black Hills, Carolina, Central Arizona, Central Arkansas, Central Illinois, Chicago Regional, Valley, Paducah, Southern Illinois-Eastern Missouri, Southern Michigan, Southwest Plains, Southwestern Idaho-Eastern Oregon, Tennessee Valley, Texas, Upper Midwest, and Western Colorado. Group B: Southeastern Florida, Tampa Bay, and Upper Florida. Group C: Pacific Northwest.

2/ Price at 3.5 percent butterfat content for the second preceding month.

 $\frac{3}{2}$ Total weighted change in gross values of milk used to produce Cheddar cheese and butter/nonfat dry milk.

4/ Class III price for the second previous month minus the computed Class II price for the second previous month. If the computed Class II price was equal to or higher than the Class III price, there is no adjustment.

1/ "Dairy Market News," AMS. 2/ Daily weighted average. Exchange price will be effective from day of release until the next release date; holidays and weekends are included. Weighted days per month will equal the number of calendar days. 3/ The Chicago area plant price is for the 26th of the preceding month through the 25th of the current month, as reported by National Agricultural Statistics Service. This price was used in the computation of the Butter-powder "Snubber" price (See Table 19) through June 1993. Effective July 1993, this price series was discontinued. For July 1993 to date, the Central States price is used in this computation.

^{1/} Based on prices at test as reported in "Agricultural Prices," NASS; converted to a 3.5 percent test by using the butterfat differential specified in Federal milk orders for conversion of the M/W price. 2/ Average price reported paid to producers for manufacturing grade milk, f.o.b. plants in Minnesota-Wisconsin as reported by NASS. 3.5 percent price converted by using the butterfat differential. See 1/. 3/ (Chicago Wholesale Grade A butter price times 4.2) plus (nonfat dry milk, spray, Chicago area plant price times 8.2) less 48 cents. Effective July 1993, the Chicago area plant price was replaced with the Central States price. 4/ "Agricultural Prices," NASS. 5/ Animals sold for dairy herd replacement only. 6/ Figures are published for January, April, July, and October only. 7/ Mid-month price. 8/ Includes beef cows and cull dairy cows sold for slaughter, but not dairy cows for herd replacement. 9/ Pounds of 16 percent mixed dairy feed equal in value to 1 pound of milk sold to plants. Since the price of 16 percent mixed dairy feed is reported only for 4 months--see 6/, the figures for other months are calculated using the last known feed price. For example, the figures for February and March use the January feed price and the respective all milk price for February and March.

^{1/ &}quot;Consumer Prices: Energy and food," BLS, U.S. Department of Labor. Regions are defined as the four census regions. According to BLS, average prices are best used to measure the price level in a particular month, not to measure price change over time. To measure change over time, the Consumer Price Index and its component indexes for individual items are more appropriate. The average food prices included in this table reflect variations in brand, quality and size amoung geographic areas. BLS suggests that users of average food prices should be aware that these differences exist.

^{2/} Prices are per 1/2 gallon.

^{3/} Prices are per pound for Grade AA, salted, stick butter.

^{4/} Prices are per 1/2 gallon for prepackaged, bulk, regular.

1991 PROMOTIONAL ACTIVITIES UNDER FEDERAL MILK ORDERS*

A 1971 amendment to the Agricultural Marketing Agreement Act of 1937 provides the statutory authority for producers to develop advertising and promotion programs within the framework of the Federal milk order program. The amendment authorized "the establishment of research and development projects and advertising (excluding brand advertising), sales promotion, educational and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products, to be financed by producers in a manner and at a rate specified in the order on all producer milk under the order."

Promotion activities under Federal milk orders since 1984 have been affected by the national program for dairy product promotion, research, or nutrition education authorized by the Dairy and Tobacco Adjustment Act of 1983 (Act). The Act called for the issuance of a Dairy Promotion and Research Order (Order) to establish the program and National Dairy Promotion and Research Board to administer the program. This program, fully effective in May 1984, is funded by a mandatory 15-cent per hundredweight assessment on all milk produced in the contiguous 48 States and marketed commercially by dairy farmers. The Act provides for a credit of up to 10 cents per hundredweight to dairy farmers who participate in ongoing qualified State or regional dairy product promotion, research or nutrition education programs. Advertising and promotion programs under Federal milk orders are certified as qualified programs so that producers may receive credit of up to 10 cents of the mandatory 15-cent assessment for contributions to the programs.

When the nationwide program became effective in 1984, the three Federal milk orders with advertising and promotion programs were amended to provide a fixed assessment rate of 10 cents per hundredweight. (See Table A.) In addition, it became necessary to change the refund provisions of the Federal milk orders because of the mandatory assessment under the national program. Thus, the orders now require that any requests for refunds of the assessment be honored by having the market administrator send such refunds to the National Dairy Board or to another qualified State or regional dairy product promotion, research or nutrition education program designated by the producers. These amendments remain in effect for the duration of the Order. Should the National Order be terminated, producers not wishing to participate in a Federal milk order advertising and promotion program would be able to obtain a refund upon written request to their market administrator as provided in the 1971 statute.

Producers and producers' cooperative associations organized the Federal milk order advertising and promotion agencies. These agencies are responsible for developing programs and plans to allocate funds collected under each program. Each agency is empowered to allocate the advertising and promotion funds for any of the purposes specified in the statute.

All programs and projects developed by the Federal milk order advertising and promotion agencies are subject to review and approval by the U.S. Department of Agriculture before funds can be spent. Each agency's books and records and any organization receiving funds from them are audited by the market administrator of that Federal milk order to insure that approved programs and projects are carried out in accordance with their initial design and intent.

Three Federal milk order advertising and promotion programs were in effect during 1991. These advertising and promotion agencies represent the following areas: Eastern Ohio-Western Pennsylvania, Indiana, and Nebraska-Western Iowa. Overall producer participation in the three Federal milk order advertising and promotion programs during 1991 averaged 98 percent. (See Table B.) During the first two quarters of 1991, the producer participation rate averaged 98 percent and increased to 99 percent in the last two quarters. The increase in the second half of 1991, was the result of lower requests for refunds in Eastern Ohio-Western Pennsylvania and Indiana. The overall producer participation for Nebraska-Western Iowa was constant at 96 percent for all four quarters of 1991.

During 1991, the \$6.2 million deducted by handlers from payment to producers were distributed by market administrators for

the three Federal milk order advertising and promotion programs -- a 1 percent decrease from the amount deducted in 1990. (See Table C.) The small decrease was due primarily to lower milk marketings.

Of the \$6.2 million deducted for 1991, approximately 2 percent -- \$94 thousand -- was directed to other State and regional qualified programs. This represents a decrease of approximately \$22 thousand from the amount directed to other State or regional qualified programs in 1990. Of the \$5.9 million budgeted for advertising and promotion by the three agencies, approximately 80 percent was budgeted for local programs, 19 percent for Nationwide programs, and less than 1 percent for administration. (See Table C.)

^{*} Prepared by Lance Jervis, Agricultural Marketing Specialist, Promotion and Research Staff, Dairy Division, Agricultural Marketing Service. FMOS-384, May 1992 Summary.
